

# Amazon OAuth integration introduction

1 step

# Authentication process

Proceed to create an amazon integration on our side.

The screenshot shows a mobile application interface for creating a new vendor integration. The form is titled "New Vendor integration" and is divided into two main sections: "Main information" and "Order import preferences".

**Main information:**

- Vendor integration provider \***: A dropdown menu with "Amazon" selected.
- Name \***: A text input field containing "Amazon store".
- Preferred tracking number type \***: A dropdown menu with "Internal" selected.
- Preferred service code \***: A text input field containing "C2".
- Pickup address \***: A dropdown menu with "Tadas (Zipas UAB)" selected.

**Order import preferences:**

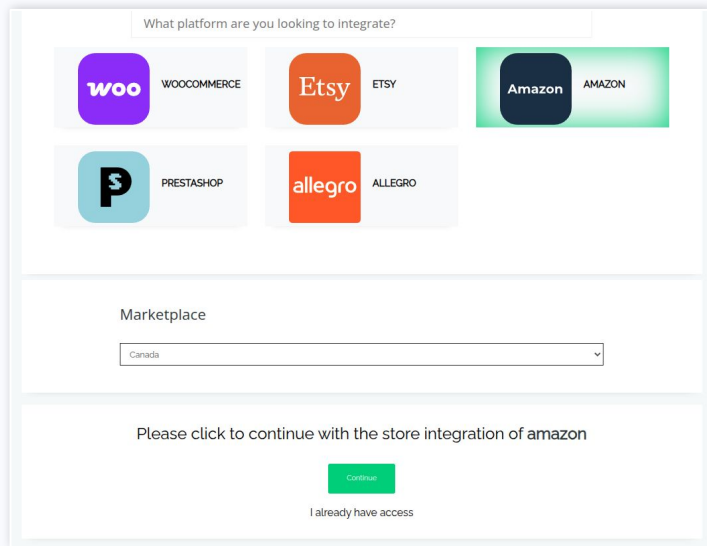

- Unfulfilled**: A toggle switch that is currently turned off.
- Fulfilled/Shipped**: A toggle switch that is currently turned on.

At the bottom right of the form, there are two buttons: "Close" and "Save".

# Authentication process

Choose the marketplace from which the orders should be imported from. Press **“Continue”** and proceed with the authentication process.

A screenshot of a web interface for selecting a marketplace for integration. At the top, there is a text input field with the placeholder text "What platform are you looking to integrate?". Below this, there are five selectable options arranged in a grid: "Woo" (WooCommerce) with a purple icon, "Etsy" with an orange icon, "Amazon" with a dark blue icon, "Prestashop" with a light blue icon, and "allegro" (Allegro) with a red icon. The "Amazon" option is highlighted with a green gradient. Below the grid is a "Marketplace" label and a dropdown menu currently showing "Canada". At the bottom, there is a text prompt "Please click to continue with the store integration of amazon" and two buttons: a green "Continue" button and a link "I already have access".
